

6516206334.txt

This revolutionary service pioneered by XM satellite radio, this new and innovated group of entrepreneurs, is superior to any of the obsolete AM or FM radio stations I have ever listed to in my life.

They offer me, the American consumer, with program choices that I could only dream about prior to this new and improved radio technology.

Tell those obsolete multimillion dollar radio and TV corporations to take their influential bribe money and either make necessary programming improvements in order to meet the needs of the consumer and remain competitive with XM radio or FOLD instead of using their power to prolong mediocracy while bribing politicians to inhibit innovation and improvement.

Let free enterprise reign. THIS IS AMERICA NOT RUSSIA.

Furthermore, do not cave into the religious zealots who want to impose their religious ideologies on the rest of us by censoring XM 150 comedy. If they (the zealots) CHOOSE not to listen to the material aired on comedy XM 150 there are 119 other tracks they can choose from.
